OFFICIAL NEWSPAPER OF THE UNDERGRADUATES OF MASSACHUSETTS INSTITUTE OF TECHNOLOGY

VOL. LXXIV. NO. 2

CAMBRIDGE, MASSACHUSETTS, FRIDAY, FEBRUARY 12, 1954

5 CENTS

Selective Service Qualification Test Given On April 22

All eligible students who intend to take the Selective Service College Qualification Test in 1954 should file applications at once for the April 22 administration. Selective Service National Headquarters advised today.

An application and a bulletin of information may be obtained in the Military Service Information office, Room 14-S136, or at any Selective Service local board. Following instructions in the bulletin, the student should fill out his application immediately and mail it in the special envelope provided. Applications must be postmarked no later than midnight, March 8, 1954. Early filing will be greatly to the student's advantage, according to Educational Testing Service, which prepares and administers the College Qualification Test.

Results will be reported to the student's Selective Service Local Board of Jurisdiction for use in considering his deferment as a student.

Annual Campaign Of TCA For Blood Begins Next Week

Solicitation for T.C.A.'s annual Spring Blood Drive will begin next week. Dick Schwind '55, chairman of the campaign, announced today that the Bloodmobile will be at Walker from March 15-18. All Institute personnel 18 and over are invited to donate.

The pledge drive is being held next week in order to have time to obtain parental permission for those under twenty-one, and to facilitate scheduling appointments. Efforts will be made at this time to contact all the members of the M.I.T. family.

Schwind, in commenting on the value of the blood program, said, "M.I.T. is the only university that we know of that has a united blood program. Anybody in the M.I.T. community—students, faculty, employees—can obtain blood for himself, or his immediate family, from the Red Cross for just the asking. But if the Red Cross is going to be so generous to us, we must be generous to them."

Summer Session 1954 Planned To Be Largest Of Type In MIT History

Preparations for the largest program of special professional courses and conferences in its history are now being made for the summer of 1954 at the Institute.

Professor Ernest H. Huntress, director of the Summer Session, last night announced plans for 34 Special Summer Programs, a series of professional Conferences and Symposia, and more than 100 subjects from the Institute's regular courses to be given during the coming summer.

"A principal purpose of the Institute's Summer Session," Professor Huntress said, "is to make available, in a form permitting the participation of busy industrial and professional people, means of keeping up with recent advances in many technical areas."

"Thus," he added, "M.I.T. through its Summer Session may contribute to the technical advancement of many who might not otherwise be able to take advantage of the Institute's special experience, faculty, and facilities."

Cagers Top W.I.P., 67-60 For Second Straight Triumph

A greatly improved M.I.T. varsity brought its season's record up to a respectable three wins and five losses with a 67-60 victory over Worcester Polytechnic Institute. This was the Beavers' second win in a row. They had previously defeated the U. S. Coast Guard Academy by a score of 60-54.

The Coast Guard game was a real thriller, with M.I.T. trailing by one point going into the fourth quarter. They soon took the lead, however, and pulled away on the strength of their foul shooting, having forced the Sailors to resort to a tight, pressing defense. In this quarter the Techmen scored sixteen points, on three field goals and ten free throws, to the Coast Guards' nine tallies.

Shilensky Stars

Of particular note is the tremendous improvement of Stan Shilensky '55, Tech's 6-6 center. He and Gifford Weber '55 put on a great two-man show, scoring 22 and 19 points, and grabbing ten and six rebounds, respectively. In six previous games Shilensky had scored a total of 22 points and grabbed ten rebounds.

For the Coast Guard Academy Fall was high scorer with fifteen points, most of which came in the first quarter. His fouling out at the end of the third period was a real blow to the Guardsmen. Erikson and Allen, with 13 and 12 points respectively, also played well. Erikson held the team together in the fourth quarter, scoring half its points.

Tech Dumps W.P.I.

On January 20, W.P.I.'s basketball team invaded M.I.T. in search of a beaver skin for its victory mantlepiece, but returned to Worcester (Continued on page 6)

LSC Presents Lecture On Anti-Red Techniques Next Tuesday Afternoon

Next Tuesday, February 16, the M.I.T. Lecture Series Committee will present Mr. Vladimir Rudin who will speak on the possibilities of the overthrow of the present Communist government of Russia.

Mr. Rudin is eminently qualified to speak on this subject, having been associated with a group of underground workers operating from West Berlin. Specifically, he has been associated with the NTS (National Alliance of Russian Solidarists), an organization which has as its aim the overthrow of the Communist government of Russia. A competent journalist and lecturer, Mr. Rudin has written articles for many magazines and newspapers (among them the Los Angeles Daily News), and has, in addition, made appearances on radio and television throughout the West Coast.

Mr. Rudin will speak in Huntington Hall (room 10-250) at 5:00 P.M. This will be Mr. Rudin's first public appearance since his recent return from Berlin.

Dance In Great Court Under Consideration In Senior Week Plans

Work has begun on plans for Senior Week, with Thomas Bastis '54 as chairman of the Senior Week committee. At the last meeting Chan Stevens '55 was elected junior member and treasurer of the committee. A dance on a portable floor in the Great Court is planned to supplement the Moonlight Cruise, Senior Ball, and other traditional events.

A tentative schedule has been announced by the committee. The Stag Banquet is planned for Friday, June 4. The Informal Dance is expected to be held on June 5. An outing may be scheduled for Sunday, June 6. Monday, June 7, is the prospective date of the Boat Cruise, and the Senior Ball is tentatively scheduled for Tuesday, June 8.

M.I.T. To Play Host To Eastern Debate Tourney

Debaters from over thirty colleges and universities from all over the eastern seaboard are expected to attend the Eighth Annual M.I.T. Debate Tournament, to be held on Friday and Saturday, February 19 and 20. Contestants will include Smith, Tufts, Georgetown, Temple, Navy, Harvard, Brown, Cornell, and St. Peters, the winner last year.

The tournament will consist of four rounds with semi-finals and finals. The debates will be traditional Institute style debates which feature cross-examination in the rebuttals. This feature has long made this tournament a favorite among New England Colleges.

Chairmen are needed to welcome the debaters and to keep time for the debates. Anyone interested in acting as a chairman should contact Robert Evans, Atkinson 405.

Tech Show Sponsors City-Wide Contest To Choose College Queen

Entries for a contest to choose a city-wide college queen are now being accepted, according to Mr. B. J. Sadoff, Jr., public relations manager of Tech Show.

The competition, sponsored by the Institute's student-written and student-produced musical comedy, prospectively will involve college beauties from the area who will be judged on the basis of the theme, "The Girl I Would Most Like to Take to Tech Show."

Pershing Rifle Smoker Tyler Lounge On Monday

Pershing Rifles will hold their semi-annual smoker in Tyler Lounge on Monday, February 15, at 5:00 p.m. Pershing Rifles is a national military fraternity for basic corps students. All freshmen are invited to attend. The group will be addressed by Captain Nicholas J. Blazensky, commanding officer, and his staff. Members of the military departments will speak a few words, and then refreshments will be served.

It has recently been announced that M.I.T. will become headquarters for the newly formed Twelfth Regiment of the Pershing Rifles. The company will function as it has in the past, except that some of the juniors and seniors will function as a Regimental Headquarters to administer other companies in the New England Area.

The Organization was founded by General of the Armies (then Captain) John J. Pershing in 1894 at the University of Nebraska at Lincoln, Nebraska. The purpose of the organization is as it was then—to produce better officers from the ROTC program. This is achieved at M.I.T. by giving freshmen and sophomores intensive training in all phases of drill, by their own officers. Better drill men come from the Pershing Rifles program because of the greater

Dean Fasset Will Talk At The Tech Open Staff Meeting

Frederick G. Fasset, Associate Dean of Students and Director of the Technology Press, will address an open meeting of the staff of The Tech to be held next Thursday.

Dean Fasset will speak on "The responsibility of a college newspaper towards the college community."

The staff meeting, which will begin at 5:00 p.m. in Litchfield lounge, Walker Memorial, on Thursday, February 18, will be open to all prospective staff candidates as well as members of all student publications. Refreshments will be served.

The Tech is currently conducting a campaign to increase the size of its several staffs. A number of positions are currently open on the business and circulation staffs, as well as on the news copy, features and sports staffs.

According to Norman G. Kulgein '55, general manager of THE TECH, "The problems of financing and paying for the necessary expansion of services of a college newspaper, are as demanding and as satisfying to solve as any similar problems in industry or government."

amount of individual attention that the student receives. The officers are elected by the company, and are trained in the exercise of command.

The organization is not based solely on drill. It has many other activities, such as maneuvers, dances, parties, and stags. This year a very successful maneuver was held in the Breakhard Reservation. The maneuver was to send groups of men on a compass course in complete darkness over unfamiliar terrain while maintaining cover and concealment from "monitors". The maneuver was culminated by a road march under simulated combat conditions. Another maneuver is being planned for the spring term.

On Tuesday evening a stag dinner is being held for the members. A bowling party is planned for later in the term as well as a dance.

The company will supply an honor guard for the Military Ball to be held on March 19. The company will also supply a drill team for some of the intermission entertainment for the ball.

The biggest event of the year is the annual drill meet held at New York. The company will compete with twenty-one other companies in

(Continued on page 8)

N.Y. Police Dept. Joins Search For WMIT Property

Ins Comm To Be Asked For Additional Funds

The New York Police Department has been brought into the investigation of the theft of nearly \$1000 from station WMIT during the Christmas vacation.

At the request of station officials, the New York police last week checked their files of second-hand goods for sale for the missing equipment. No sign of the stolen radio gear was found. A complete report on the facts of the robbery along with a formal complaint by the station is to be submitted this week.

To Ask For More Money

Meanwhile, WMIT has announced its intention to bring the question of funds to make good its losses before Institute Committee again at its next meeting. At its last meeting, Institute Committee recommended a \$500 loan to the station but turned down a further grant of \$500. Institute Committee appropriation of funds of this size must be approved by the Undergraduate Budget Board. That body, has not as yet taken any stand on this issue except to affirm that some form of financial assistance be made available to the station.

New Appointments To M.I.T. Faculty Reported Recently

New faculty appointments and promotions at the Institute have been recently announced by Dr. James R. Killian, Jr., president.

Promoted to the rank of assistant professor is Vincent J. Roggeveen, a member of the Department of Civil and Sanitary Engineering. Thomas P. Rone has been appointed assistant professor in the Department of Mechanical Engineering.

Military personnel recently appointed to the faculty include Colonel Charles M. McAfee, Jr., associate professor in the Department of Military Science, and Captain E. H. Littlejohn, Captain James P. Smith, and Captain Frederick L. Wilson, assistant professors in the Department of Air Science and Tactics.

John G. Outwater, Jr. has been named an Industrial Liaison Officer at the Institute.

Professor N. Padelford Assists In Preparation Of A.F.R.O.T.C. Text

Professor Norman J. Padelford of the Department of Economics and Social Science recently conferred with Maj. Robert E. Showalter, Maj. Donald D. Braden and Mr. Larry Stauffer, representatives from the Air Force R.O.T.C. Division of the Air University, for the purpose of discussing the new A.F.R.O.T.C. textbook, "Military Aspects of World Political Geography." Maj. Showalter stated that Prof. Padelford, a recognized authority on geopolitics, offered many valuable suggestions on material which will be included in the textbook.

The course, Military Aspects of World Political Geography, is being included in the Advanced Air Force R.O.T.C. curriculum in order that future Air Force officers will have a basic knowledge of the geopolitical factors which affect the security of the United States.

Editorial

"WE ASSERT THE RIGHT TO TAKE SIDES" — VOLUME 74

Unlike many college newspapers, *The Tech* is a completely independent organization. It is not controlled by the Institute, and perhaps more important, it is not controlled by student government. This is a fact which has not been appreciated by students nor by some former managing boards. In short, *The Tech* is in a position rare among college newspapers. To fully appreciate this fact, one has only to look at some recent cases involving undergraduate newspapers elsewhere. The editorial board of *The Observation Post*, one of two newspapers at the College of the City of New York, for example, was suspended by a joint committee of faculty members and officials of student government. Its offense—criticizing individual members of student government for their voting record on a specific issue in which the newspaper was interested. At the University of Georgia, the allocation of funds to the student newspaper was stopped because of an editorial criticizing the state government, and, indirectly, the university. The point is not whether the actions taken against the newspapers were justified, but rather that such actions were possible at all. It is reassuring to know that similar cases cannot occur here at the Institute.

The great degree of independence that this newspaper enjoys does not mean that it is without responsibility to the M.I.T. community. On the contrary, perhaps more care and judgment must be exercised in content and in editorials than in the case where some other "official" group is responsible for the paper. Unfortunately, this fact has, in the past, been taken to imply the necessity of a sterile editorial policy, i.e., a neutral, middle-of-the-road stand on nearly all controversial issues. Such a policy is not consistent with the principles of free journalism. We feel that it is a basic responsibility of an unfettered press to bring to its readers facts and intelligent opinions on all issues pertaining to Institute life, even if in so doing certain groups or well-established institutions are cast in an unfavorable light. However since *The Tech* is the only regular undergraduate newspaper on campus it is a monopoly of a sort and since further it is erroneously regarded by outsiders as an official organ of the Institute there are certain self-imposed restrictions which must be invoked. Most of these, like printing articles and editorials in good taste and never allowing the paper to become a sounding board for private disputes, are evident. Nevertheless it is our contention that the lack of editorial action when such action is clearly required constitutes an abandonment of one of the basic aims of an effective newspaper. This, then, is the rationale for the new volume of *The Tech*.

The impending school elections offer ample opportunity to apply these principles. On February 23, school-wide elections will be held for the newly-established office of President of the M.I.T. Undergraduate Association. Large numbers of students signed each of the nominating petitions that were circulated this week. Any student who read the statements on these petitions will realize that essentially all the candidates have said can be summarized in the following three sentences. "I'm a nice guy with a good activity record. I can administer the office better than any of the other candidates. Vote for me." This has been the story of past M.I.T. "elections" as well. To say that this situation is unhealthy would be a gross understatement unworthy of us. Each year, Institute Committee handles approximately \$85,000 for use in student activities. It would seem obvious that the least a candidate for an office in the body which controls this amount of money could do is to offer some specific platform or program as a basis for his election by his fellow-students. A great deal more will be said on the matter of elections in forthcoming editorials.

The Tech enjoys the position of being a free newspaper mainly because of the support of the students. It is high time that we rewarded this support by truly candid comments of vital issues. This is what we propose to do.

through the mail

To the Editor of *The Tech*:

It has been brought to our attention in a letter published in *The Tech* today that some of the dormitory men feel that we are discriminating against them. While the facts stated in the letter are essentially true, the error on our part was one of omission rather than commission. The only reason that the hall chairmen did not receive this letter and the order blank was due to the fact that we did not realize a method for making group sales in the dormitories. Last night upon reading a copy of Mr. Madey's letter, it occurred to one of the members of the publicity staff that the hall chairmen would be an effective organization for the distribution of blocks of tickets.

Tech Show, which is far from a fraternity or fraternity slanted organization, urges you as we urge any group at MIT to take advantage of the unusual social event which Tech Show offers to groups. We did not recognize the possibility of dormitory parties, before and after Tech Show, being planned through the hall chairmen.

Fellowships For after hours Executive Training Are Now Available

College graduates whose major studies have been in science, engineering, or engineering administration and who wish to pursue advanced study for master's degrees in industrial management are eligible for Graduate Fellowships in the School of Industrial Management at the Institute.

A number of fellowships carrying cash stipends of up to \$2,100 plus full tuition for married men and up to \$1,400 plus full tuition for single men will be awarded for the academic year 1954-1955, according to Professor Thomas M. Hill, chairman of the School's Graduate Committee. Awards may be continued for a second year when performance justifies.

Graduate work in the School, he said, is designed for men who have degrees in science or engineering and whose qualifications indicate potential executive ability. Fellowships will be given to those who show unusual professional promise as indicated by experience, extra-curricular activities, and outstanding academic performance. Fellowship applicants must, of course, satisfy all Graduate School admission requirements.

Applications should be filed by March 1, 1954, or as soon thereafter as possible, Professor Hill said.

DANCES

Friday, February 12

Simmons—The Techtonians will provide the music for an acquaintance dance in Alumnae Hall. You can get acquainted there for only 45c. Enjoy your self, while the term is still young.

Regis—You can go "crazy-man" at the two hour jazz concert starting at 8. Dancing follows the "bebop" and lasts until 12. All "hep cats" can obtain admission for a single buck.

Sargent—An informal Valentine Dance is to be given by these girls who are majoring in physical education. See you at the Sargent College Gymnasium, 6 Everett St., Cambridge. Admission 60c.

Saturday, February 13

M.I.T.—Live it up at the first I.D.C. dance for the spring term. Entertainment and refreshments are included in the \$1.00 admission. Leave your slide rule at home, and try to have a good time.

Radcliffe—The International Student Association in Cambridge are having a special Valentine's Day Dance at Radcliffe's Agassiz Hall. If you're headed in the direction of Harvard Square tomorrow night at 8:30 drop in and enjoy the free continental atmosphere.

Harvard—The Harvard Outing Club is having a Square Dance at Radcliffe's Memorial Hall, starting at 8. Dick Best will be the caller. So swing your partner over to Radcliffe and promenade around with the rest of the Nature Boys.

Carlton Club—The Carlton Club presents another in its series of acquaintance dances at the Hotel Beaconsfield, with entertainment and music by a well-known dance band. Why not go and get acquainted with a co-ed from some nearby school? New members should bring identification to show their educational status. 1731 Beacon St., Brookline. Admission \$1.25.

Next Week

Wheaton College, Norton, Mass., will roof the International Student Conference sponsored by the International Student Association in Cambridge. After an address by Mr. Donald C. McKay, from Harvard and a discussion on the conference's theme "One World Or Two", there will be a dinner, entertainment, and a dance. The cost will be \$1.50 plus your transportation. So if you're looking for an interesting evening at an ALL GIRLS COLLEGE call UN 4-1600 and make your reservation. Saturday, February 20.

Wellesley—SCOOP, SCOOP! Wellesley is going to have its big social, The Wellesley Winter Carousel, next week, February 19, 20, 21. The weekend festivities will include a formal, a square dance, and a jam-session plus other entertainment.

THEATRE

"Guys and Dolls" This musical based on Damon Runyon's short stories, continue its run at the Shubert Theatre until February 20. Thoroughly enjoyable. "My Three Angels"—After a successful run in New York, this comedy opens at the Plymouth Theatre on February 15. Walter Slezak is starred in the play.

Tech Mermen Twice Beaten By Harvard And Conn. U.; Freestyle Relay Team Wins

Last month the Beaver varsity swim team was trounced twice by strong squads from the University of Connecticut and Harvard by scores of 57-27 and 71-13 respectively.

On Saturday, January 9, Conn. U. dumped Tech by sweeping all events but the final relay. Superiority in all three strokes enabled the Connecticut mermen to gain and hold onto a sizable margin.

The trio of Bob Jantzen '56, Walt Buck '55, and Captain Don Bailey '54 bowed in a close race to the Uconns' medley relay team. Following this defeat, Lincoln and Brady of Connecticut outswam Quinn Solem '56 and John Roberts '56 of Tech.

Tech Captures Seconds

The Beavers made a bid for the lead as Tom Hamilton '55 in the 50-yard freestyle, Bailey in the 100 free, and Jantzen in the 200-yard backstroke captured second places behind Maxwell, Winchell, and Beckingham of Conn. U. Although Tech failed to place in the individual relay, Manfred Tidor '54 took a second in diving.

The Uconns then pulled ahead as Kouble won the 200-yard breast stroke and Conn's Brady and Liverum outdistanced Fred Holmes '54 and Bob Mason '54 in the 440 freestyle.

Tech's single victory came as the 400-yard freestyle relay of Joe Hamlet '56, Lynn Pearson '56, John Roberts '56, and Don Bailey '54 outswam Nixon, Allison, Kerrigan, and Killiany of Connecticut. The final score was University of Connecticut 57, MIT 27.

Crimson Dumps Beavers

On January 13, the Beavers were again swamped as a strong Harvard squad outclassed them in all events. Tech was able to capture

second places only in diving and backstroke, with all other firsts and seconds going to the Crimson.

The Harvard medley relay team gained the first victory, and were immediately followed by first and second for the Crimson in the 220-yard freestyle, the 50-yard free, and the 150-yard individual medley. Third places in these events went to John Roberts, Tom Hamilton, and Walt Buck respectively, for Tech.

Strongest Showing

The strongest Tech showing came in diving, where Tidor and Jim Dwyer '54 copped second and third behind Snails of Harvard. Don Bailey took third in the 100-yard freestyle, while Bob Jantzen won a close second in a hard-fought race with Harvard's Mulvey for Tech's only racing second of the evening.

Harvard dominated the rest of the meet, taking first and second in the 200-yard breast stroke, the 440-yard freestyle, and the final relay, thus coming out on the long end on a 71-13 count.

FIND THE RIGHT JOB AFTER COLLEGE

NAS Service Helps You NOW—

Newly developed career plan open
to students of all classes—at no cost or obligation.

If you're like most college students, you probably haven't made up your mind what you're going to do after graduation. There's no more reliable source of advice than your own College Placement Bureau.

To further clarify your thinking, to help you decide where your particular skills will find the greatest opportunities by comparing one field against another, NAS has opened the way for you to secure first hand information from leading companies in the fields that interest you most.

NAS can do this because, as advertising representatives of more than 700 college newspapers, we are in daily contact with many of the most important and progressive companies in America. These companies not only constantly seek college-trained men and women, but often plan far ahead in competing with one another for the most promising prospects.

So, you see, this new NAS career plan is a service both to college students and business leaders. Here's how it works:

The coupon below indicates the fields in which the greatest opportunities exist today. You check those that interest you as a possible career. We'll do our best to see that your inquiry is referred to one or more of the

leading companies in those fields. Of course, we can't guarantee a response. We're merely volunteering our services as a link between the campus and the business world. But in many cases you'll hear directly from leading companies in the fields you've chosen.

Their information should first of all give you a practical, down-to-earth picture of what the industry itself offers in the way of a career. Secondly, at the company level, it may include valuable facts and figures about working conditions, pay, and chances for promotion. Finally, filling in this coupon may even lead to job offers that would otherwise never have come your way.

So act now. If you're a junior, or even a sophomore, it's not too soon to join the seniors in considering a business career. The sooner you start, the more information you collect, the better your chances to find the right job after college.

Williams Defeats Beaver Grapplers By 26-1 Margin

Hampered by the loss of four regular grapplers, the Tech varsity wrestling team dropped a surprising 26-1 decision to a strong Williams College team at Williamstown in the closing days of the fall term. Among the wrestlers not accompanying the team were two undefeated stars, John Hirschi and Walt Lawson.

In the opening match, Dave Nasatir '55 wrestled what was probably his best match of the season, but lost in the final minutes. Captain Jack Kennaday '55, wrestled at a light 130 pounds, ran into a strong opponent in 'Bags' Pitts, one of the Williams mainstays. Kennaday took an advantage early in the second period and maintained it into the closing minutes, but Pitts surprised him with a last-second takedown and gained a tie in the match.

Tired and out of practice, Cliff Monzeglio '56 managed to escape a pin, although greatly out-classed by his opponent. At 157, Jack Buell '56 wrestled his first intercollegiate match and was pinned. Paul Federbush '55 also succumbed to his opponent.

At 177, Jack Endriss '56, another last minute substitute, kept even with his man for one period, but lost an 11-4 decision. Heavyweight Ed Zoolalian showed improvement, but was pinned in the first period to complete the rout.

The next scheduled match for the Beavers is on February 20, against

Varsity, Frosh, JV'S, Approach MSRA Crowns

With the season nearing completion, the varsity, freshmen, and junior varsity squash teams can gain an unprecedented sweep of the Massachusetts Squash Racquets Association B, C, and D leagues.

The varsity edged into the lead for the first time this year as they defeated Lincoln's Inn Society 4-1 Wednesday. With only one match remaining, the varsity's record is 26-9 while the Tech Faculty-Grads own a 25-10 slate. Paul Rudzinski '54 and Hossein Nasr '54 blasted out easy 3-0 wins, while Hugh Harriman '54 and John Melavas '54 rallied to gain 3-2 victories. Paul Goldin '54 suffered his first defeat in MSRA competition as he was whipped 3-0.

In the state C league, the junior varsity has all but mathematically clinched the division I championship. Sporting an eye-opening 31-4 record, the JV's have routed seven consecutive opponents. The team is composed of Raphael Morales '55, Walt Stahl '56, Bob Warshaw '54, Don Steig '55, and Dick Lane '54. The JV's must meet the other faculty-graduate team, probable winners in division II, in a home and home series for the C title.

The freshmen combined with several JV's are in a strong position to break a first place tie with the Union

Boston University, Coach Roger Leathers expects the squad to be at full strength for this encounter, and has high hopes for Tech victory.

Riflemen Finish Successful Trip With 6-3 Record

Last weekend, the varsity rifle team returned victorious from their six-day annual southern trip to Washington and New York, with six wins, three losses under its belt.

The tour started well for the Beavers, who won the first four matches by a wide margin. However, when they came up against the National champions from the University of Maryland, the squad fell short, although their score was high enough to overcome most and close enough to worry the Terrapins.

The same afternoon, the Techmen romped over an unprotesting Georgetown University team. After dropping the next two matches, the Beavers rallied to overcome the Maritime Academy, which, like Maryland, boasts a member of the All-American squad.

Just before the contest against Maryland, Coach Voelcker announced that because of his excellent shooting against the Coast Guard and George Washington University, Dick Oman '55 has been elected a member of the Ancient and Honorable Order of the Derby.

Boat Club in class D. Paced by freshmen standouts Howie Cohen and Thomas Thomas, the freshmen-JV combination has a fine 26-4 slate. The JV's who have shared the burden of defeating the clubs around Boston are Elliot Cramer '55, Eugene Vinson '56, Gordon Bruggeman '55, and Dave Reed '55.

the bush leaguer

Cage Playoffs Start Monday, E.C., Grad House Favorites

by Goldin

The intramural basketball campaign came to an end as six teams entered the playoffs. These teams will engage in a round-robin tourney with East Campus II and Graduate House B installed as the pre-tourney co-favorites.

East Campus II broke all existing records by submerging Beta Theta Pi 70-19, and Club Latino 94-18. Leading Beta by 21-13 at the end of the first quarter, the dorm five stepped up their attack to lead 40-15 at half-time. Dick Hurlbut with 22 points and Dimitry Vergun with 16 points paced the attack while Dom Aucamp and Hill Prager helped East Campus with their fine ball handling.

In its final tilt, the dorm quintet shattered its previous record of 82 points. Dimitry Vergun dominated both backboards in the process of dunking 37 points through the hoop, a new individual record. He was aided considerably by Ken Meliere and Don Aucamp with 12 points apiece, while the fine passing and shooting of Bob Lait, Dick Hurlbut, Jack Friedman, John Zarcaro, and Tony Ryan, set up innumerable baskets.

Graduate House B moved easily into the playoffs on the wings of a 60-23 victory over East Campus I. Held to a 14-8 margin at half-time, the Graduate quintet hit on over 60% of their shots in the second half to overwhelm East Campus I. Bill Erman and Bill Missimer paced the grad five with 40 points between them.

In a complete reversal of form, Baker House A upset Delta Kappa Epsilon 39-25 to break a first place tie in league III. In a previous encounter, the Dekes had easily out-classed Baker, but the second meeting proved to be a different story. Led by Joe Giuttari and Marinos Gerakaris, the Baker five forged into an early lead and withstood a last

gasp Deke rally.

Another former league champion went down to defeat as a fighting Walker Staff quintet shackled Graduate House A to the tune of 26-23. Trailing by 3 points with less than three minutes to go, Paul Valerio and Norm Ness came through with two spectacular steals to put the student staff into the lead. The Walker five added two more fouls to give them the margin of victory.

Walker was forced to come from behind in its overtime encounter with Sigma Nu to clinch a playoff berth. A last second basket gave the Walker Staff a tie during regulation time as they gained a 28-27 win in overtime. Art Sargent, Valerio, and Ness, all excelled with their aggressive, heads-up ball playing.

Alpha Tau Omega used the formula of defeating your nearest opponent by trouncing Kappa Sigma 44-26. For three quarters, center Hans Westphal had kept the Kappa Sigs in the game with his fine rebounding. In the final period, however, the accurate shooting of John Stelling who amassed 15 points, and the tremendous rebounding of Tony Vertin sparked the ATO's to their second successive league title.

The only other finalist, Lambda Chi Alpha, completed its season several weeks ago. They upset Theta Chi, the defending champ, to take the league I crown.

The playoffs open Monday with East Campus meeting the Walker Staff and ATO clashing with Graduate House. On Tuesday, Lambda Chi Alpha meets Baker A to complete the first round.

THE TECH'S TOP TEN

(votes in brackets)

- 1—East Campus II (98)
- 2—Grad House B (91)
- 3—ATO (81)
- 4—SAE (57)
- 5—Baker A (52)
- 6—Walker Staff (52)
- 7—Lambda Chi Alpha (40)
- 8—Grad House A (30)
- 9—Sigma Nu (28)
- 10—Deke (21)

IT'S ALL A MATTER OF TASTE

We didn't like the pretty hat
That I had set my heart on.
No argument on Luckies, though—
We buy them by the carton!

Georgia Lee Herring
Colorado A. & M.

When you come right down to it, you smoke for one simple reason... enjoyment. And smoking enjoyment is all a matter of taste. Yes, taste is what counts in a cigarette. And Luckies taste better.

Two facts explain why Luckies taste better. First, L.S./M.F.T.—Lucky Strike means fine tobacco... light, mild, good-tasting tobacco. Second, Luckies are actually made better to taste better... always round, firm, fully packed to draw freely and smoke evenly.

So, for the enjoyment you get from better taste, and only from better taste, Be Happy—Go Lucky. Get a pack or a carton of better-tasting Luckies today.

The college survey plainly shows
How smart we students are—
We've chosen Lucky Strikes again,
The smoothest smoke by far!

William Hanlon
Holy Cross College

COLLEGE SMOKERS PREFER LUCKIES

A comprehensive survey—based on 31,000 student interviews and supervised by college professors—shows that smokers in colleges from coast to coast prefer Luckies to all other brands! The No. 1 reason: Luckies' better taste!

You may be from a northern state;
You may be from Kentucky;
But, nation-wide, here's one good tip:
Be Happy and Go Lucky!

Gwendolyn N. Jenkins
Fisk University

empty-handed, the victim of M.I.T.'s best team effort to date. Eight men broke into the scoring column, with Carl Hess '55, Allen Schultz '54, Shilensky, and Weber hitting double figures. Eight men broke into the scoring column. In our opinion this was Hess' game. Not only was he high scorer with 14 points but he was the main cog in the Beavers' overall floor attack, leading the fast break and setting up many buckets with his fine passing.

The same four men who have been doing the bulk of the Techmen's rebounding this year again did a fine job off "the boards." Shilensky with 12, Weber and Schultz with 8 and Ken Christie '54 with 5 were the top shot-retrievers of the day. On the season Weber, who stands at 6 ft. 3 in., has been our biggest man when it comes to rebounding. He has snared 57 of them. Following him are Shilensky and "Red" Schultz with 47 each and Christie with 40.

Weber High Scorer

It is interesting to note that besides being the squad's top rebounder, Weber is its highest scorer. Giff has swished the nets for 107 points well ahead of Carl Hess who is second with 77. Third man on the scoring totem pole is Schultz with 60. Weber scores most of his points on an awkward-looking but deadly jump shot, a fine outside one-hander, and tap-ins which come as a result of his rebounding ability. Hess seems to score on almost every kind of shot in the book; set shots, driving lay-ups, jump shots, one-handers, etc. His one fault in the scoring department can be found in the fact that he makes almost no tap-ins, but what can you expect of an outside man even if he is 6 ft. 1 in. The mainstay of Schultz's scoring artillery is a terrific jump shot which, due to the almost unbelievable spring in Dutch's legs, is virtually impossible to stop.

Sophs Star

An interesting feature of the W.P.I. game was the fine play of two Sophomores, Larry Hallee and John Patierno. They scored 9 and 4 points respectively. Larry, the star of last year's Freshman team with a scoring average of over 24 points per game, is a potential high scorer and top rebounder for the varsity. Patierno is an excellent back-court man who can drive well and can score from the outside with a sensational one-hander. Coach Scotty Whitelaw was very happy with the play of these two boys. Now that they have "won their spurs" he will be able to use them more freely and thereby have the depth that he has needed all season.

To get back to the ball game: It was Tech all the way. At the end of the first half the score was 32-25 our favor. In the third quarter the Beavers broke the game wide open scoring 20 points as opposed to Poly's 10. The only reason for the comparatively close final score was the extreme laxness of the team's defense in the fourth quarter. This was probably due to the novelty of having a big lead.

As far as W.P.I. is concerned probably the only bright feature of the game was the play of a huge substitute center named Hering. He led the team in scoring with fourteen points, ten of which he scored in the fourth quarter, and did a good job of rebounding. Two other men, Bloom and MacLaren also scored in double figures for W.P.I.

Team Improves

The team seems to be rounding into shape. The last two games were easily its best performances to date. With a much-improved Shilensky, two high-flying forwards in Weber and Schultz backed up by Christie and Hallee, and a good contingent of back-court men led by Hess, Jack Britt '55, John Byrnes '54, and Patierno, M.I.T.'s basketball outlook is the rosiest it's been in a long time. We are looking forward to a second half of the season which will be much more successful than the first half was.

HUGHES Cooperative Fellowship Program for

MASTER OF SCIENCE DEGREES

Purpose

The Hughes Cooperative Fellowship Program has been established to enable outstanding graduates to pursue work for the Master of Science degree while employed in industry and making significant contributions to important military projects.

Eligibility

Eligible for consideration are students who will receive the B.S. degree during the coming year and members of the Armed Services being honorably separated and holding B.S. degrees. In either case the field of the B.S. degree must be:

**ELECTRICAL ENGINEERING
PHYSICS, OR
MECHANICAL ENGINEERING**

The awards will be made to applicants who have evidenced outstanding ability and some degree of creativeness. They must also possess traits enabling them to work well with others.

Citizenship

Applicants must be United States citizens for whom appropriate security clearance can be obtained, as their work in the Hughes Laboratories may be related to National Defense projects.

Universities

Applicants must be able to meet the requirements for admission to graduate standing at the University of California at Los Angeles or the University of Southern California.

Program

Participants will be employed at Hughes full time in the summer and 25 hours a week during the university year while pursuing half-time graduate work.

Salaries

Recipients will earn five-eighths of a normal salary each year. This salary will be determined by the individual's qualifications and experience, and will reflect current salary practices in the electronics industry. Salary growth will be on the same basis as for full-time members of the scientific-engineering staff. Recipients will also be eligible for health, accident and life insurance benefits, as well as other privileges accruing to full-time staff members.

Sponsorship

Tuition, admission fee, and required books at either the University of California at Los Angeles or the University of Southern California, covering the number of units required to earn an M. S. degree, will be provided.

Travel Expenses

For those residing outside the Southern California area, actual travel and moving expenses to this area will be allowed up to 10 percent of the full starting annual salary.

Number of Awards

If a sufficient number of qualified candidates present themselves, as many as 100 Fellowships will be awarded each year.

Selection of Candidates

Candidates will be selected by the Committee for Graduate Study of Hughes Research and Development Laboratories.

Application Procedure

Application forms should be obtained immediately. Completed applications must be accompanied by detailed college transcripts.

Address correspondence to COMMITTEE FOR GRADUATE STUDY

HUGHES

RESEARCH AND DEVELOPMENT LABORATORIES

Culver City, Los Angeles County, California

Institute Releases New Informative Film On Library

"Bibliodynamics—The Charles Hayden Memorial Library," a 16mm color sound motion picture just completed by the library, received its first preview showing before Dr. James R. Killian, Jr., Dr. Karl T. Compton and others on January 19, 1954.

Insight Into Library

In recording the contents and facilities of this great library, the film presents a real insight into the day-to-day operations of the reading rooms and public areas as well as of the great variety of behind-the-scenes activities which serve to bring reader and book together. The film will be used by students and other Institute groups, by the alumni clubs, and by Admissions and Alumni offices. In addition it will meet a considerable demand for accurate data about the library from secondary schools, libraries, library schools, and other educational groups.

Narrated by Professor Paul M. Chalmers, the script was prepared by Miss Margaret P. Hazen and other members of the library staff, assisted by Mr. Walter L. Milne of the Institute's News Service. Photography and sound recording were by Mr. Oscar H. Horovitz '22, an amateur cinematographer of international reputation,

T.C.A. Sponsors Student Contest In Fields Of Art

T.C.A. is sponsoring an art contest in which all students may participate. The T.C.A. contest coordinator is Murray Friedman '55. The Fields of art include photography, painting, sculpture, and any other fields of interest to the students.

Rules for entering will be published in the near future. The contest is open only to students, and they must enter it through their living groups. Each living group or unit is now being contacted. A representative from each group will serve on the T.C.A. Art Contest Committee. This committee will establish the rules and choose the judges.

Although the contestants must enter through their living groups, the prizes will be awarded individually.

who also directed the film with the assistance of Mr. Robert E. Booth. The musical score was taken from a tape recording of that played at the dedication of the library.

Film Is Pioneer

This is one of the first color sound films to be recorded on a magnetic sound strip and subsequently converted into an optical color sound print. The full cooperation of the library

Living Groups To Enter Competition In Singing Ability

On Saturday, March 20, at 8:30 p.m., the Annual All Tech Sing will be held in Morss Hall of Walker Memorial. This is a singing competition between living groups in which any group of from three to forty students may enter, provided that they all represent the same dorm, fraternity, or student staff, or the 5:15 Club.

Two Awards

A trophy will be awarded to the group which receives the greatest total number of points for quality and presentation, with certificates to be given for second and third places. Another award, known as the "Egbert," will be based solely on presentation. The nature of this prize, which last year took the form of a stuffed bird, is to be a surprise.

Anyone interested in obtaining an entry blank or further details about the competition should contact Jack Dennis of East Campus, chairman of the All Tech Sing. The names of the judges and the M.C. for the evening will be announced at a later date.

staff and other Institute groups insured the success of this project.

Additional showings of "Bibliodynamics" will be scheduled in the near future.

Ian Williams Paces Tech To Millrose Relay Title; Team Places In 3 Meets

Ian Williams 54's sensational 0:49.2 anchor leg brought a Millrose relay title to the supposedly crippled Tech mile team. Fine performances were also turned in at the B.A.A. and Mass. K. of C. meets held this past month.

The Engineer runners really travelled in more ways than one since the first two meets were held in the Boston Garden, and the last one was held in Madison Square Garden in New York. They travelled in the usual sense too, never placing worse than fourth in any of these meets.

In the K. of C. Games, Tech's mile relay of Sid Klein '54, Tom Hoffman '56, Jack Saloma '56, and Ian Williams '54 came in third, beaten only by Tufts and Williams Colleges. The two mile relay came in third behind Yale and Syracuse, with Harry Schrieber '55, Ray Smith '56, Hugh Nutley '54, and Jack Farquhar '54, turning the trick in 8:02 minutes.

The B.A.A. Games saw the same Tech two mile relay team come in second behind Holy Cross in 8:00 minutes flat, while Tech's mile relay crossed the finish line in 3:29.8 minutes, being beaten out only by B.U., Williams, and Fordham.

The highlight of the B.A.A. Games as far as Tech is concerned was Ian Williams 54's victory in the special Jack Ryder 440 yard dash. Off to a good start, Williams stayed up in front throughout the race, and pounded Wilkey of Tufts and McConnachi of Holy Cross in to the ground on the home stretch to win the race in 50.3 seconds, which was a new meet record for the event.

Williams ran an even better quarter

on the anchor leg Tech's victorious mile relay in the Millrose Games; a 440 which brought the Garden crowd to their feet cheering and prompted the director of the games to send a letter of congratulations to Coach Hedlund.

Tech's relay was supposedly crippled from the very start because Harry Schrieber and Jack Farquhar, ordinarily half milers, were subbing for Hoffman and Saloma; yet both of them ran superb races. In spite of their best efforts however, on the last leg Williams got the baton 25 yards behind the first, Ray Frazier of N.Y.U.

By the beginning of the home stretch, Williams was even with Frazier, and in the stretch he drove ahead to cross the finish line victor by two feet. Needless to say this feat was accomplished only by some terrific running, and Williams' 49.2 quarter brought forth a pandemonium of cheering from the Garden spectators. Even the director of the Millrose Games, Fred Schmertz, wrote Coach Oscar Hedlund that Tech's relay team should be congratulated for its "victorious accomplishment" and "spectacular performance."

Skaters Lose To URI; Last Frame Fatal For Tech

The Tech hockey team lost their third straight game of the season as they were beaten by a University of Rhode Island sextet 6-4, at the Boston Arena.

Bob Adams, flashy URI skater, led the victors with three goals and two assists.

Rhode Island drew first blood as Adams scored midway in the first period. Tech countered with a tally immediately to tie the score at 1-1. Harold Wells '55 blasted this one in for the Engineers. The visitors added two more markers and led 3-1 at the end of the first period. Fred Culick '56, who has done an outstanding job as a wing this season, scored at 1:11 of the second period assisted by Wells to cut URI's lead to 3-2. Rhode Island retaliated shortly after with a goal, but Culick did it again as he slapped the puck by RI's goalie assisted by John Sullivan '56 at 19:47 of the second period to give RI a 4-3 lead as the final period started. Adams scored his second goal to give URI a 5-3 margin.

Then Captain John Kiley '54, stellar defenseman, scored unassisted from fifteen feet to cut RI's lead to 5-4. At this point Wells skated superbly as he went the length of the ice twice and was deprived of goals both times by RI's goalie's fine stops. Adams completed his "hat trick" one and one-half minutes before the final buzzer, making the final score 6-4.

Wells, Kiley, Duffin and Culick played well for Tech.

The Beavers play West Point at 7:00 P.M. at the Lynn Arena. Tech and Army both hold victories over UNH, and the game should be closely contested.

Lineup for the Beavers:

Goal, Aitken '56; R. Wing, Sullivan '56; R. Defense, Coult '56; Center, Wells '55; L. Wing, Culick '56; L. Defense, Kiley '54.

Spares: Bartsch '55, DiBona '55, Duffin '54, and Sherbrooke '56.

Your hands on the Future!

When you grip the wheel of an Air Force jet, your hands are on a fast, high flying future that leads to the top in jet aviation.

Once behind the controls of an Air Force jet, you leave the humdrum of everyday life . . . soar far above the cares of the crowd into a bright new future of adventure and excitement. You're part of a select flying team, playing for the highest stakes of all . . . mastery of the Jet Age! You'll win too, because you've been trained to win. You have confidence in yourself, in your fellows, and in your plane, the fastest and safest flying equipment in the world.

As an Air Force Aviation Cadet, you get in on the ground floor of jet aviation, learn jet flight with the latest equipment and best instructors. You graduate as an Air Force lieutenant earning over \$5,000 a year . . . a man thoroughly prepared for leadership in both military and com-

mercial aviation. Join the many fine young men who keep their hands on the future. Train as an Aviation Cadet!

You may be eligible

To qualify as an Aviation Cadet, you must be at least a high school graduate. However, you will be of more value to the Air Force if you stay in college, graduate, and then volunteer for training. In addition, you must be between 19 and 26½ years, unmarried, and in good physical condition.

★ Win an Air Force Commission

★ Earn over \$5,000 A Year

HERE'S WHAT YOU DO:

1. Take your high school diploma or certificate of graduation and a copy of your birth certificate to your nearest Air Force Base or Recruiting Station. Fill out the application they give you.

2. If application is accepted, the Air Force will arrange for you to take a physical examination at government expense.

3. Next, you will be given a written and manual aptitude test.

4. If you pass your physical and other tests, you will be scheduled for an Aviation Cadet training class. The Selective Service Act allows you a four-month deferment while waiting class assignment.

WHERE TO GET MORE DETAILS:

Contact your nearest Aviation Cadet Selection Team, Air Force ROTC Unit or Air Force Recruiting Officer. Or write to: Aviation Cadet, Headquarters, U. S. Air Force, Washington 25, D. C.

Research Row Is Topic Of Meeting Of M.I.T. Alumni

Last Thursday, February 4, the Institute alumni held their annual mid-winter meeting, which had as its theme "Research Row," the great concentration of research organizations along the Cambridge bank of the Charles. Speakers for the evening included Dr. James R. Killian, Jr., president of the Institute, and representatives of several of the research companies.

Mr. John H. Durant of National Research Corporation discussed and demonstrated "Metallizing," a non-electrolytic process for depositing metal coatings on almost any kind of base material.

"Operations Research," by which teams of scientists improved the effectiveness of military operations, was discussed by Mr. Warren A. Berg of Arthur D. Little, Inc. His talk emphasized the applications of these methods of attack to the solution of a wide variety of industrial problems.

Godfrey L. Cabot, Inc. was represented by Mr. C. Andy Stokes, who demonstrated the properties of carbon black and mentioned some of its future commercial possibilities.

Professor N. Levinson Given Bocher Prize For Math Research

Dr. Norman Levinson, professor of mathematics, was recently awarded the Bocher Memorial Prize by the American Mathematical Society in recognition of his outstanding work in the important field of differential equations, both linear and non-linear. The prize, founded in memory of Professor Maxime Bocher, is awarded every five years for notable research in analysis.

The presentation was made at the Society's annual meeting at Johns Hopkins University on December 30, 1953.

Do You Suffer From E. T.*?

A group of experienced student-tutors of M.I.T. are offering study (not cram) sessions this semester. The study groups, each consisting of about five students and a tutor, are designed to supplement the usual class work. It has been found in the past that these are optimum group sizes. Ideally these groups should meet once a week all semester, rather than just prior to a quiz. If you are interested in such a group in freshman or sophomore physics, mathematics or chemistry please call

UN 4-1732
evenings

BAND OPPORTUNITY

Popular Connecticut summer resort offering season contract to good 6 piece college band. Members also assist social department and enjoy guest privileges.

Write of band experience, instrumentation and a short resume of each member in first letter.

SUMMER POSITIONS

Maintenance, driving, kitchen, front office. Guest privileges. Write age, qualifications, available dates.

ADDRESS:

W. Wright, Happy Acres
Middlefield, Connecticut

W.G.B.H. Schedule

(Continued from page 3)

IAM, 1914-1953. Feb. 3—Archibald MacLeish, Richard Eberhart, Richard Wilbur, John Sweeney, John Brinnin, Merrill Moore. Recorded voice of Dylan Thomas reading from his own works. (Rebroadcast). WHY EDUCATIONAL TELEVISION? Feb. 10—Symposium. NATIONAL SYMPHONY ORCHESTRA. Howard Mitchell, conductor. Feb. 17—Mozart, Chopin, Nielsen. (Continental FM Network—WGMS). WHAT SHOULD WE SEE AND HEAR ON EDUCATIONAL TELEVISION? Feb. 24—Symposium. NEWS. Louis M. Lyons, Harvard. (Rebroadcast). WEATHER.

THURSDAY

3:30-4:30 NEWS. WEATHER. GREAT PHILOSOPHERS OF ANCIENT TIMES. A study of the philosophies of Socrates, Plato and Aristotle, in relation to the social and political conditions of their day and ours. John D. Wild, Harvard. (Commission on Extension Courses). 4:30-5:30 TOMORROW'S SYMPHONY. G. Wallace Woodworth, Harvard. 5:30-7:00 CHILDREN'S CIRCLE. Nancy Harper, Nursery Training School of Boston, Tufts. MUSIC. Bach, Orgelbuechlein. U. S. WEATHER BUREAU REPORT. THE LIVELY ARTS. Gilbert Seldes. (Rebroadcast). (WNYC). 7:00-8:30 NEWS. Louis M. Lyons, Nieman Foundation, Harvard. WHY THE WEATHER? Charles F. Brooks, Harvard. THE MIN-

ERAL WORLD. A study of the physical and chemical properties of minerals. C. Wroe Wolfe, Boston University. (Commission on Extension Courses). Beginning Feb. 18—USA—A GEOLOGICAL EXCURSION. A course in regional geology including a study of economic resources and geologic history. C. Wroe Wolfe, Boston University. (Commission on Extension Courses). 8:30-9:30 NEW ENGLAND CONSERVATORY OF MUSIC CONCERT. Feb. 4—Works by New England composers including Walter Piston, Arthur Foote, David Barnett. Feb. 11—Music for two pianos by Bach, Schubert, Schumann, Brahms, Ravel, Knashaturian. Feb. 18—Vocal duets and piano music by Bach, Schuetz, Purcell, Schumann, Bartok. Soloists: Norma Giust, Cloary, Valentina Sobalvarro, Sona Asbed, Reginald Hachey. Feb. 25—Conservatory Orchestra. Richard Burgin, conductor. 9:30 REVIEW OF THE FRENCH PRESS. (Radiodiffusion Francaise). NEWS. Louis M. Lyons, Harvard. (Rebroadcast). WEATHER.

FRIDAY

3:30-4:30 BOSTON SYMPHONY ORCHESTRA (2:10 p.m.) Charles Munch, music director. Feb. 5, 19, 26. See listing 8:30 p.m. Saturday for programs. THE SYMPHONY AWAY (2:15 p.m.). Feb. 12—Hindemith, Brahms, Schubert. LETTER FROM ITALY. (NAEB—Radio Italiana). 4:30-5:30 THE ARTS IN AMERICA TO 1865. The arts considered in the context of historical and cultural developments. Richard B. K. McLanathan, Museum of Fine Arts. (Commission on Extension Courses).

5:30-7:30 CHILDREN'S CIRCLE. Nancy Harper, Nursery Training School of Boston, Tufts. THE EVOLUTION OF JAZZ. Nat Hentoff, Northeastern. 7:00-8:30 NEWS. Louis M. Lyons, Nieman Foundation, Harvard. BACKGROUNDS. TOMORROW'S SYMPHONY. G. Wallace Woodworth, Harvard. (Rebroadcast). Except Feb. 12—FRANCE TODAY. Ian Forbes Fraser, director, American Library in Paris. Interviewed by William N. Locke, M.I.T. 8:30-9:30 LIBRARY OF CONGRESS CONCERT. Feb. 5—Vegh Quartet. Haydn, Berg, Beethoven. Feb. 12—New Music Quartet. Vitali, von Dittersdorf, Deems Taylor, Schubert. Feb. 19—New York Woodwind Quintet. Danzi, Riegger, Mozart, Milhaud. Feb. 26—Zino Francescatti, violinist; Artur Balsam, pianist. (Continental FM Network—WGMS). INVITATION TO LEARNING. (GBS-WEEI). NEWS. Louis M. Lyons, Harvard. (Rebroadcast). WEATHER.

SATURDAY

3:30-4:30 NEWS. WEATHER. NEW ENGLAND ECONOMIC TRENDS. An examination of the structure and behaviour of the New England economy as compared with other regions of the United States. Everett J. Burr, Jr., Boston University. (Commission on Extension Courses). 4:30-5:30 TONIGHT'S SYMPHONY. G. Wallace Woodworth, Harvard. (Rebroadcast). 5:30-7:00 BARCHESTER TOWERS. A serial dramatization of Anthony Trollope's novel. (BBC). NEWS. U. S. WEATHER BUREAU REPORT. REVIEW OF THE CANADIAN PRESS. (CBC-WNYC). MASTERWORKS

Pershing Rifles

(Continued from page 1)

The Eighth Regiment. The meet is divided into two parts. The first is the standard Infantry Drill in which the entire company competes. The second is "trick" drill where the movements are only limited by the imagination of the officer. In this only a small number of very highly trained men compete. In the company it is considered a distinction to belong to the drill team because it denotes a special ability at drill.

FROM FRANCE. (Radiodiffusion Francaise) 7:00-8:30 THE NEW ENGLAND RENAISSANCE (NAEB-WBUR). INTRODUCTION TO THE CIVILIZATION OF THE MIDDLE EAST. A study of the peoples, languages and cultures of the Middle East, both historical and contemporary. Richard N. Frye, Harvard. (Commission on Extension Courses) 8:30-9:30 BOSTON SYMPHONY ORCHESTRA. (8:25 p.m.) Charles Munch, music director. Feb. 6—Pierre Manteaux, conductor; Bach, Bartok, Bibeliuss. Tossy Spivakovsky, violinist. Feb. 20—Berlioz, Damnation of Faust. Soloists: Suzanne Danco, David Poleri, Martial Singher. Harvard Glee Club and Radcliffe Choral Society. Feb. 27—Chopin, Alexander Brailowsky, pianist. THE SYMPHONY AWAY (8:30 p.m.). Feb. 13—Hindemith, Brahms, Schubert. NEWS. WEATHER.

Liggett & Myers Tobacco Co. says...

FOR more than thirty years we have used research day in and day out learning about tobaccos and cigarettes in the public's interest.

Continuously we and our consultants have analyzed, experimented with and smoked all kinds of tobaccos... especially Southern Bright, Burley, Maryland and Turkish cigarette tobaccos.

Our own cigarettes and competitive brands have been submitted to the most exacting scientific scrutiny including thousands of analyses of millions of pounds of tobaccos.

From all these thousands of analyses, and other findings reported in the leading technical journals, our Research Department has found no reason to believe that the isolation and elimination of any element native to cigarette tobaccos today would improve smoking.

For four years we have maintained in the smoker's interest an intensified larger scale diversified research program. A half-million dollar 30-ton machine, the world's most powerful source of high voltage electrons, designed solely for our use has tested tens of thousands of cigarettes. This program has already given to us direct and significant information of benefit to the smoking public.

Our consultants include Arthur D. Little, Inc. of Cambridge, Massachusetts, "one of the largest and most reputable industrial research organizations in the country" (From Business Week Magazine) and eminent scientists from leading universities.

Today the public can confidently choose from a variety of brands—by far the best cigarettes ever made by the tobacco industry.

Liggett & Myers Tobacco Co.

Many scientists within our laboratories are analyzing cigarette tobaccos every day.
